(57) **CLAIM**

The ornamental design for an embossed paper, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of an embossed paper according to the design showing one outer ply of the embossed paper; the unit bounded by dashed lines being repeated;
FIG. 2 is an enlarged fragmentary sectional view taken along line 2—2 in FIG. 1;
FIG. 3 is a bottom plan view of an embossed paper according to the design showing another outer ply of the embossed paper; the unit bounded by dashed lines being repeated; and,
FIG. 4 is an enlarged fragmentary sectional view taken along line 4—4 in FIG. 3.
The dashed lines within the central portion of the embossed paper represent one repeat unit of the surface pattern and the broken lines around the periphery of the paper product in FIGS. 1 and 3 indicate that it repeats indeterminately in all directions, it being understood that the surface pattern repeats uniformly throughout the length and width of the embossed paper.
